-  Effective tech leader with customer focus and tenacity to deliver high quality results.
-  Passionate full-stack engineer with 18+ years of experience in software development.
-  Hands-on architect with deep technical knowledge and design patterns expertise.
-  Talented developer with remarkable design aptitude and special attention to details.
-  Pragmatic programmer with strong analytical thinking and problem-solving skills.

Lead Applications Engineer – [Dotdash Inc.](#) New York, US

5/18 – Present

Effective tech leader with customer focus and tenacity to deliver high quality results. Passionate full-stack engineer with 18+ years of experience in software development. Hands-on architect with deep technical knowledge and design patterns expertise. Talented developer with remarkable design aptitude and special attention to details. Pragmatic programmer with strong analytical thinking and problem-solving skills. Technologies: AWS, Python, JavaScript, Django, React, Vue, Material Design, Cypress, Celery, Docker, Keycloak, PostgreSQL, Memcached, Redis, Sentry.

Data Visualization Engineer – [Telefonica S.A.](#) Madrid, ES

1/17 – 5/18

Led the development of a suite of analytical products, delivering market insights and relevant information in relation to competitors. Built a tool to improve decision making on best rates, used by sales teams in 14+ countries to reduce the churn rate and increase loyalty. Implemented workflows and complex data visualizations, to guide product teams into enriching customer data and boosting local businesses. Technologies: Python, JavaScript, Django, React, GraphQL, D3, Celery, Docker, Ansible, MySQL, Elasticsearch.

IT Mentor – [European Innovation Academy S.A.](#) Lisbon, PT

7/16 – 7/17

Provided advice and guidance to multi-disciplinary teams, offering an experiential learning opportunity with deep insight into the startup life. Coached students to consider and weigh potential consequences of decisions and actions, so that they avoid pitfalls and predictable surprises. Encouraged mentees to move out of their comfort zones and take risks when appropriate, in order to move forward and innovate. Technologies: Objective-C, iOS, Android, Ruby, Rails, Python, Django, JavaScript, Node.js, Groovy, Grails, Scala.

Research Engineer – [Amadeus IT Group S.A.](#) Nice, FR

7/13 – 12/16

Spearheaded development of a meta-search based travel website, empowering users to find the best flights and plan their trips collaboratively. Created a Rails-backed iOS application for managing travel expenses, featuring capture of receipts with OCR technology and e-mail reports. Played a major role in a virtual interlining project, allowing travelers to connect flights from competitor airlines onto a single itinerary. Technologies: Python, Django, Ruby, Rails, Objective-C, iOS, JavaScript, Backbone, Marionette, Docker, MongoDB, Ansible, Logstash.

Designed Java middleware architecture and developed reusable components on large-scale systems running 50+ million of bookings per month. Researched JVM-based languages and created a sandboxed scripting engine, enabling 3rd-party customization to products via a cloud platform. Supervised development teams throughout a division with 300+ engineers, while providing technical guidance and advocating best practices. Technologies: Java, Groovy, Spring, Hibernate, JRuby, Jython, GWT, Play, JiBX, Gradle, Maven, Ant, WebLogic, SQL Server.

Led the development of a vast variety of tools, having as main objective to facilitate the global data center consolidation process. Reverse engineered a legacy application written in ASP.NET and rebuilt it to leverage a rules engine for classifying documents. Technologies: Java, Drools, Spring, Hibernate, Tomcat, Tamino XML.

Developed claim solutions to facilitate the communication between insurances, body-repair shops and assessors in 40+ countries. Supported a module for placement of wrecks in an electronic auction, open to qualified professional buyers. Technologies: Java, Struts, EJB, JBoss, OC4J, Oracle9i.

Developed a client-server application for managing flight operations, featuring a tracking module for storing real-time data. Built components to display aeronautical routes and weather satellite graphics on an interactive world map. Technologies: Java, Swing, OpenMap, Spring, Hibernate, JBoss.

B.S. Computer Science – Pontifical Catholic University of São Paulo

A word cloud featuring various programming languages, frameworks, and tools. The words are arranged in a circular pattern, with some words being larger and more prominent than others. The colors of the words are diverse, including shades of blue, green, yellow, orange, red, purple, and grey. The words include: React, Python, Django, Celery, Groovy, Cypress, Rails, Docker, Spring, Hibernate, Logstash, Ansible, Maven, MongoDB, Vue, MySQL, Grails, GraphQL, Node.js, JavaScript, Material Design, PostgreSQL, Keycloak, Elasticsearch, Ruby, Android, Scala, Droids, Objective-C, AWS, Gradle, Memcached, iOS, Redis, and Spark.
